

CDCC Participants Early Re-screening Guide

Previously, participants who have been initially screened with normal results or without the need of entering treatment phase will be re-screened after 3 years.

NEW

Re-screening earlier than 3 years can be initiated by family doctors due to the following reasons:

Annual screening for individual having prediabetes without HT

High-risk individual requiring more frequent screening

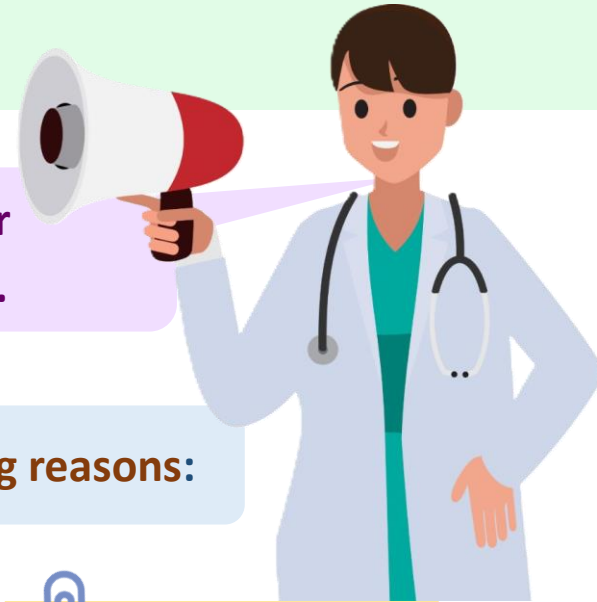

Change in clinical condition requiring more frequent screening

Other reasons being specified

Please click the “Re-screening” button in Health Profile and select the reason to proceed with the screening process again.

Re-screening

Quick Guide for Re-screening

1

Click "Re-screening" in Health Profile

Clinical Progress
Chronic Disease Co-Care Pilot Scheme
